Earth Defenders Toolkit

Digital Democracy

OFFLINE KIT

1

Make sure you have everything that comes with the kit:

1. Zimaboard computer
2. WiFi Card
3. WiFi antennas
4. Power supply
5. Power adapters
6. Ethernet cable

2

Attach both antennas to the WiFi card by gently twisting them into the connectors
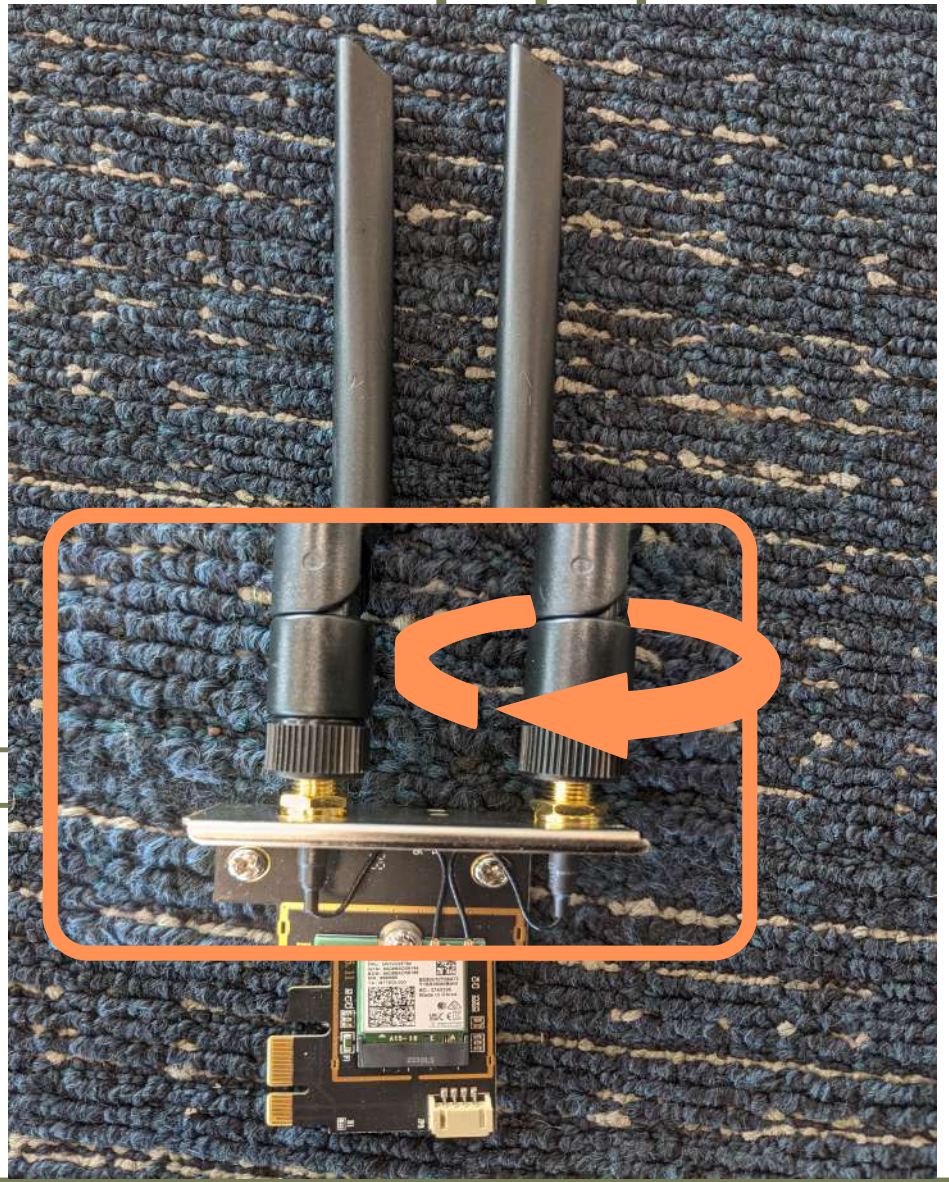

3 Connect the WiFi card to the Zimaboard computer's PCI Express slot, making sure it's connected appropriately and firm

4

Use the ethernet cable to connect the computer to your Internet router

Either port on the Zimboard computer can be used, but make sure to use a **LAN** port on the router, usually **YELLOW** **NOT** **BLUE**

5

Insert the appropriate adapter, according to your region, to the power supply and twist it clock-wise to lock it into place

6 Connect the power supply to the computer ❶, and plug it to the energy source

Check the **red** light ❷ on the side of the computer in on, and after a while that the **blue** light ❸ on the WiFi card is also on

7 The Offline Kit is ready to be used, after a few minutes check that the WiFi network is available, connect to it, open the captive-portal and start exploring
